Table contain 6 main columns

Time: UTC TIME

OHLC: Open, High, Low, Close

Prediction: Status Up Trend or Down Trend

Continue Uptrend: You can open a trade at the current price.

Reversal or Previous Trend: If you see this status you need to wait for a while to change it to uptrend or downtrend to confirm the trend direction and open a trade. But if you already have an ongoing trade then it is time to exit from the trade or put a desire stop loss. As the trend is about to change or continue to the previous trend. Most common practice is. When you see this status. Update take profit limit. So, if the trend reverses you will be out from the trade with the profit and if the trend continues you will gain more.

Continue Downtrend: When you see this status. The coin you have selected will continue to go down more. So, stay away from the coin. Don't open any trade for the selected coin. But you can use this for Leverage Trading Short Position.

Tips: You can use this tool for leverage trading as well as we show both statuses. Uptrend or Downtrend. For better understanding pricing action add EMA 90(Red Color) and EMA 5(Green Color). This tool works based on many conditions. So, this is the best things to identify the trend generated by the tool.

if you have any question don't hesitate to ask in the group
